

Blockchain Security Audits

Blockchain Security Audits

WHY AN AUDIT?

SECURITY

Be sure that your project in which you have spent countless hours building can't be exploited by an outsider. Also users can safely invest knowing their funds are safe.

TRUST

Build trust in your community by letting an objective third party check on the contracts and implementation.

By building trust users will spread the word about your project as a safe investment.

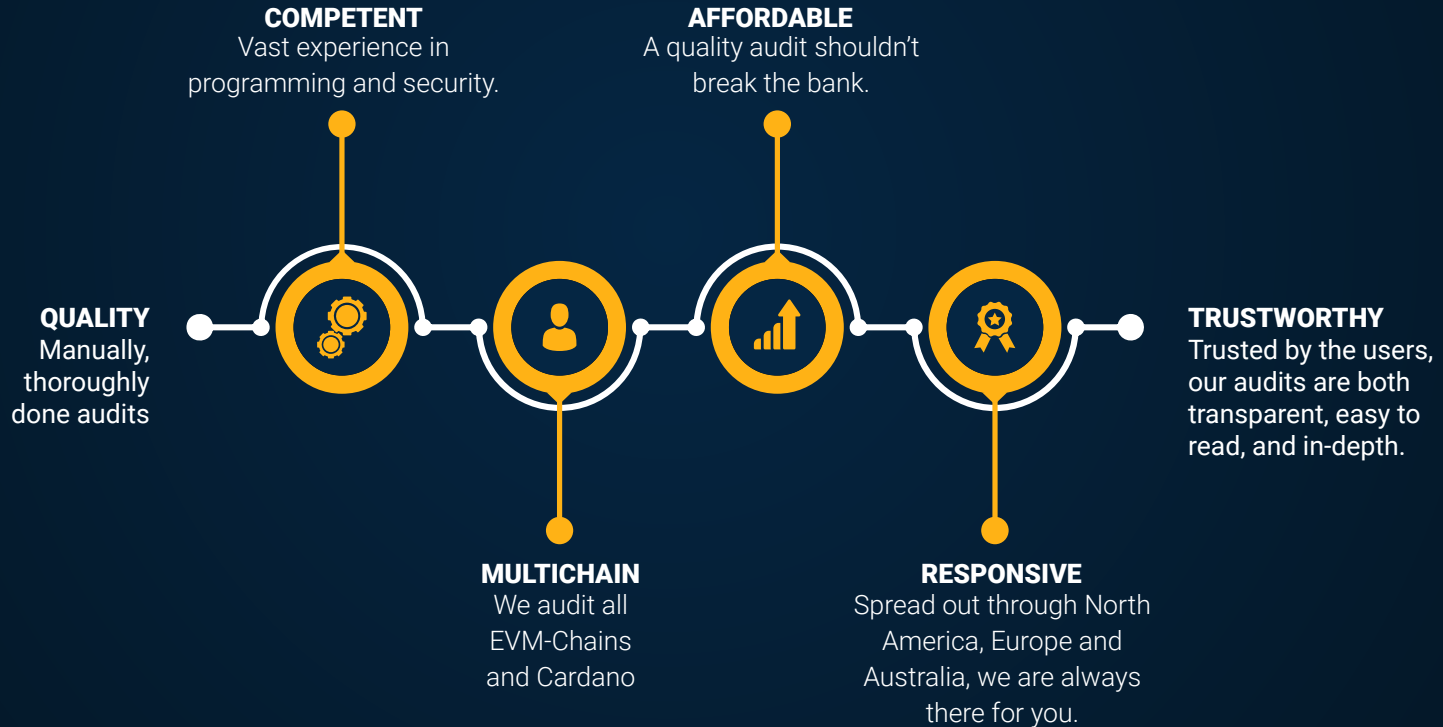

MARKETING

Use the audit for marketing purposes and when dealing with new partnerships.

Not all users can read code, but anyone can read our fancy, and easy to use auditing templates.

WHY OBELISK?

AUDIT PROCESS

INITIAL AUDIT

Multiple auditors go through your contracts independently and send you a combined findings outline.

01

FIXING ISSUES

It's common to have at least some issues found and you get ample time fixing the issues.

02

RE-AUDIT

Auditors re-audit findings as soon as they are fixed.

03

04

PUBLISH CONTRACTS

You get a final approval that you can now publish your contracts.

05

ON-CHAIN ANALYSIS

We audit the contracts implementation on the block chain and that it matches the initial audit.

06

FINAL REPORT

You get a final fancy report that you can share. We also publish the report on our social media.

The background is a dark blue gradient. It features several decorative elements: a large yellow gear outline on the left, a smaller yellow gear outline at the top center, and a white gear outline at the bottom right. There are also various horizontal and vertical lines in white and yellow, some grouped together, creating a technical or industrial feel.

“I was really impressed by your efficiency. Every time I check in, you guys are already on the next step”

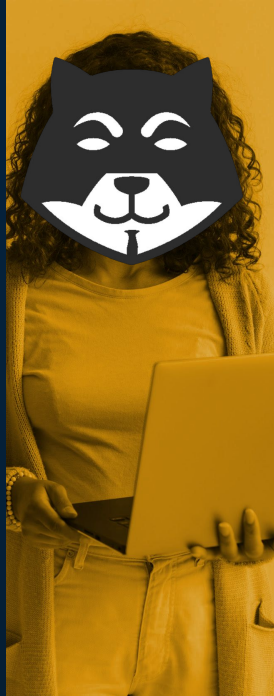

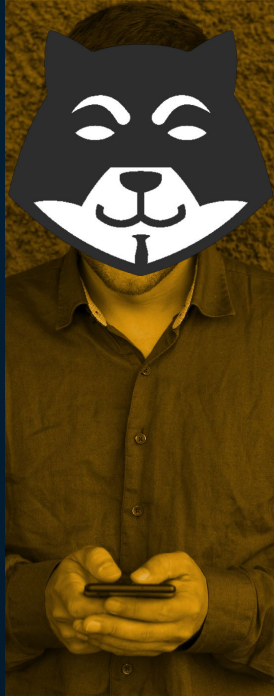

—KOGEFARM

ABOUT

Started in early 2021, Obelisk Auditing has come to be one of the most trusted blockchain security auditing firms. One major key to our success is the focus on Quality where we don't leave anything to chance. We help all kinds of projects with their security needs, and we audit projects on any EVM-compatible chain such as Ethereum, BSC, Fantom, Polygon, AVAX, KCC, and also Cardano.

THE TEAM

JOHN or JANE DOE?

Obelisk Auditing consists of a group of semi-anon security experts that specialize in security and structural operations. All our audits will always be conducted by at least two independent auditors for maximum security and professionalism. As a comprehensive security firm, Obelisk provides all kinds of audits and project assistance.

Currently Obelisk consists of a team of 8 individuals where 6 of us are auditors.
